Planning and Development Phone: (702)229-6301
Planning and Development Fax: (702)385-7268

Dear neighbors,

On August 9th, my wife and I met with the planning commission about our proposed renovation of our home. Just to remind all of you that might not received our first letter, here is a summary:

We lived in the same home for over 14 years and are expecting our first child in January. Instead of moving to a larger home we decided to improve ours as much as we can.

We assure you that our house, when finished, will be beautiful, tasteful, and most importantly, our home. We intend to stay here on Karli Drive and raise our family.

The planning commission suggested that we talk with our neighbors and convey our plans. Please see the diagram of our home layout and the new garage we are going to build. The reason we needed to go to the commission is because the garage needs a variance to get a permit. The variance is for us to build ten feet closer to the curb than the current regulations permit.

We would really appreciate your support on this matter; we are returning to the commission on the 23rd and invite you all to come along. We are also gathering signatures to present to the commission to demonstrate that we are trying to improve our home and the neighborhood that we have all come to love.

We ask that if you have any questions or concerns about our project to please contact us either by phone, or just come on by. We would be happy to share our plans and our thoughts with you.

Sincerely,

Paul and Heather Blonsky
